

Tunajenga Company Limited - Services & Pricing

Service Portfolio Overview

Tunajenga Company Limited offers a practical engineering ecosystem designed to help clients understand modern engineering concepts, execute real projects, and develop production-ready engineering solutions. Each engineering resource can be used independently or as part of a structured engineering journey.

Tunajenga Programs - Structured Engineering Training

Structured programs provide step-by-step learning paths covering modern engineering topics from fundamentals to production implementation.

- Modern civil and structural engineering development
- Project management and advanced infrastructure systems
- Automation systems and multi-disciplinary systems
- CAD design and blueprint implementation
- Production compliance, evaluation, quality control, and deployment

Tunajenga Projects - End-to-End Implementation

Project-based execution shows how individual engineering components work together inside complete applications and realistic engineering workflows.

- End-to-end site plans and architecture
- Structural analysis and execution pipelines
- Operational workflows and tool integration
- Safety protocols and project interfaces
- Site deployment and production considerations

Tunajenga Consultations - Technical Content

Focused consultations explain important engineering concepts, frameworks, tools, and engineering patterns through clear theory and practical implementation.

- Concept-focused technical consultations
- Step-by-step design demonstrations
- Architecture and workflow explanations
- Framework and tool walkthroughs
- Production engineering best practices

Tunajenga Community - Collaboration & Support

The Tunajenga community supports continuous development through technical discussions, practical resources, project guidance, and structured engineering learning paths. The goal is to create a focused environment for building, designing, and deploying engineering solutions.

- Development-focused discussions
- Project and roadmap guidance
- New engineering tutorials and updates
- Program and project announcements
- Community knowledge sharing

Pricing & Plans

Tunajenga Company Limited provides a mix of open consulting resources and premium structured engineering experiences. Pricing may vary by project, program, platform, or offering.

Initial Consultation

Designed for clients who want to explore engineering concepts and practical implementations.

- Access to public engineering case studies
- Selected project walkthroughs
- Architecture and concept explanations
- Community learning content
- Engineering updates and technical guidance

Premium Contracts

Best suited for clients who want structured, deeper, and project-focused engineering execution.

- Complete structured project execution
- In-depth analysis and implementation
- Hands-on engineering and end-to-end projects
- Production-oriented engineering practices
- Pricing depends on the selected project or engineering platform

Corporate & Partnership Engagement

Tailored engineering, solutions, or technical collaboration may be available for organizations and partners based on scope and requirements.

- Custom engineering or technical solution requirements
- Engineering workshops or collaborations
- Project-focused operational content
- Custom pricing based on scope

- Partnership terms defined per engagement

Billing & Access

- Project pricing and billing depend on the contract or offering selected.
- Execution duration and included resources are specified with each project or program.
- Taxes and payment terms apply according to the relevant framework and local regulations.
